The Power of Two

Application Engineering

Custom Solutions for Customer Problems

STANMECH Technologies is proud to provide Application Engineering support for our customers. We develop solutions focused on the precise use of air to improve the efficiency of existing or new systems. We configure our technology to suit each specific customer application, from using low volume – high temperature hot air (4000 l/min @ 700°C) to high volume – medium temperature hot air (28,000 l/min @ 400°C), we can create a custom solution built just for you. We've developed solutions for customers in the automotive, pharmaceutical, medical, cosmetic, packaging, confectionary, and food industries.

If you have a unique problem or are looking to reduce costs and energy consumption we may have the solution you're looking for.

Some benefits include:

- ◆ Reduced operating costs
- ◆ Less time lost
- ◆ Smaller machinery footprint
- ◆ Increase in profit
- ◆ Better efficiency
- ◆ Increased reliability

*Whenever you
need to apply
heat, LEISTER
provides the
ideal solution*
