

573 Direct Drive Blower

The 573 direct drive centrifugal blower is ideal for air knife drying, vacuum, fluidized bed and aeration applications. This blower has been designed for use with our inline air knife heaters.

Benefits

- Compact, rugged design
- Heavy duty, high quality construction
- High speed, high flow rate
- Efficient power utilization
- Direct drive motor technology
- 2" water gauge @ 50 CFM
- Complete with 1 year warranty
- Available with a recirculating air option
– up to 300°C inlet air temperature

Why Buy From US

The 573 blower is only available in Canada from STANMECH and its distributor network. The 573 blower is ideal for those applications requiring an efficient, cost effective high flow rate air source.
