

FA-ST Overwrapping Machines

Package Machinery Company once again lives up to it's long standing reputation for quality and dependability with the FA-ST. The latest in high speed tuck and fold wrapping technology.

Benefits

- Heavy duty, rugged design
- Heavy-gauge welded construction
- Large colour touch screen for easy operator interface
- Ultra quiet Allen Bradley servo drive components
- Uses 15 – 20% less film than flow wrappers
- Capable of sealing a wide variety of paper & plastic films with glue or heat
- Quick change components enable fast package size changes
- Guarded with polycarbonate safety shielding in electrical safety interlocks
- Adjustable tack bar & side heaters
- Options available – code dater, imprinter, stainless steel, low film indicator, locking steel casters, spare parts kit, film static eliminator

Why Buy From US

The FA-ST is available in Canada only from STANMECH and its distributor network. This overwrap machine is ideal for wrapping many different materials.
